PROFILE

Front-End Developer with hands-on experience building and maintaining scalable web applications in a government environment, including systems for Direktorat Jenderal Bea dan Cukai. Skilled in developing high-performance, responsive interfaces using modern web technologies and micro frontend architecture. Possesses additional experience in backend integration and Android development, enabling contributions across the full development lifecycle. A fast learner who thrives in collaborative teams, with a strong focus on delivering reliable, efficient, and user-centric solutions.

EDUCATION

Informatics Engineering

Yarsi University

2020 – 2024
Jakarta, Indonesia

- GPA of 3.90/4.00.
- Assistant Lecturer for Database 1 Course.
- Assistant Lecturer for Object Oriented Programming (OOP) Course.
- Assistant Lecturer for Web Design and Programming Course.
- Participated in student exchange program PMM Bela Negara.
- Member of Student Organization - Himpunan Mahasiswa Informatika (HIMFO), Talent Interest Division.

EXPERIENCE

Frontend Developer

PT Daro Data Teknologi

02/2025 – Present
Jakarta, Indonesia

Working as a Front-End Developer assigned to Direktorat Jenderal Bea dan Cukai, focusing on maintaining and enhancing the CEISA 4.0 web application.

- Maintained and enhanced multiple Micro Frontend (Micro FE) components to ensure system stability and scalability.
- Diagnosed, analyzed, and resolved production issues through efficient code-level fixes, improving application performance and reliability.
- Developed and delivered a new Micro Frontend module to support feature expansion and system modernization initiatives.
- Collaborated cross-functionally with System Analysts (SA) and Backend Engineers (BE) to ensure seamless API integration and data consistency.
- Performed ongoing bug fixing, system maintenance, and performance optimization across various application modules.
- Utilize Git and GitLab for version control and repository management to maintain code quality and streamline collaboration.

Android Engineer

Binar Academy

02/2023 – 07/2023
Jakarta, Indonesia

- Completed intensive training in Kotlin and Android development fundamentals, building multiple functional mobile applications.
- Developed Android applications with Activities and Fragments to handle structured navigation and user interaction flows.
- Implemented local data storage solutions based on official Android architecture guidelines.
- Built applications integrated with remote APIs to fetch and display dynamic data.
- Applied clean and structured architecture in handling background processes and file management.
- Implemented user-friendly UI/UX for mobile applications following Android best practices.
- Utilized development tools such as Android Studio, version control systems, and debugging tools to support development workflows.
- Collaborated in a team environment using modern collaboration tools and version control practices.

SKILLS

Technical Skills

- React.js
- Next.js
- JavaScript
- TypeScript
- HTML5 & CSS3
- Tailwind CSS
- Redux
- React Query
- Ant Design
- Bootstrap
- Node.js
- Express.js
- Kotlin
- Git

Soft Skills

- Strong collaboration and teamwork
- Problem-solving and analytical thinking
- Adaptability in fast-paced environments
- Effective communication skills
- Continuous learning mindset
- Detail-oriented and quality-focused

PROJECTS

K-Etik

02/2024 – 07/2024

Web Development

Architected and implemented K-Etik, a comprehensive ethics committee management system for Universitas YARSI, utilizing a modern MERN stack (MongoDB, Express.js, React.js, Node.js). Engineered responsive front-end interfaces with React.js, implementing role-based dashboards for proposers, administrators, reviewers, and committee chairs. Developed scalable RESTful APIs using Node.js and Express.js to handle complex workflow management and user authentication. Designed and implemented MongoDB database schema to efficiently manage research proposals, user data, and committee decisions. Successfully streamlined the ethics review process, reducing administrative overhead and improving communication between stakeholders through an integrated platform that enhances research ethics compliance standards.

Shinzou

06/2023 – 07/2023

Android Development

Developed Shinzou, an Android-based flight ticket scheduling application using Kotlin and Android Studio. Engineered an intuitive mobile interface that enables users to efficiently browse and filter flight schedules based on multiple parameters including dates, passenger count, and seating class preferences. Implemented data handling and filtering algorithms in Kotlin to ensure smooth performance and real-time search functionality. Successfully created a user-centric application that streamlines the flight ticket search process, enhancing the overall travel planning experience Android interface.
